

## **RHINOMED'S MUTE AND TURBINE TECHNOLOGY RECEIVE REGULATORY CLEARANCE FOR CANADIAN DISTRIBUTION**

**December 3<sup>rd</sup>, 2015. Melbourne, Australia.**

Australian medical technology company Rhinomed Ltd (ASX:RNO) today announced it has received its Medical Device Establishment Licence (MDEL) from Health Canada for the distribution of Turbine sports breathing technology and Mute snoring and sleep technology as Class I medical devices in the Canadian market.

This regulatory licence enables Rhinomed to import and sell both products into Canada and importantly, continue dialogue with distributors seeking to distribute the Mute and Turbine in the region.

The company will seek to distribute the Turbine through the Canadian cycling, triathlon and sporting store outlets and major sporting retailers. Distribution of the Mute product is planned to be through pharmacies. According to the National Association of Pharmacy Regulatory Authorities as of January 1, 2015 there were 9,558 community pharmacies and 285 In patient hospital pharmacies in Canada.

### **About**

Rhinomed Limited is a Melbourne, Australia based technology firm with a focus on nasal, respiratory and breathing management technologies. The company is developing and commercialising applications of its technology portfolio in the Sport, Sleep, Wellbeing and Drug Delivery markets. For more information, go to [Rhinomed.global](http://Rhinomed.global)

### **About Mute.**

Mute is a patented nasal respiratory technology that has been found to reduce the volume and frequency of snoring in 75% of users in a five day in home user trial (n=118 couples). Mute is easy to use, drug free and fits discreetly inside the nose. The Mute is made from ultra soft polymers and works by stenting the nose and reducing nasal resistance. Mute encourages nasal breathing and reduces the need to open the mouth during sleep, factors critical to a reduction in snoring and better sleep quality. For more information or to purchase Mute visit [www.mutesnoring.com](http://www.mutesnoring.com) or Boots.com

### **About Turbine**

Turbine is a revolutionary respiratory technology designed specifically for the sport and exercise market. Turbine assist those who struggle to breathe through the nose by stenting the nostrils and delivering an average increase of 38% more air through the nasal passages. The technology has been adopted by leading athletes in cycling, triathlon, running and a range of aerobic sports and exercise activities. You can purchase a Turbine by visiting [www.theturbine.com](http://www.theturbine.com)
